

RESEARCH INTERESTS

My research focuses on quantifying population immunity and understanding how immunity and transmission shape outbreak risk. In parallel, I advise policymakers in Ho Chi Minh City, Vietnam on designing resilient and sustainable surveillance systems, and train an in-house modelling team for the government to strengthen decision-making and outbreak response.

EDUCATION

2022-2026 **PhD**, University of Oxford, United Kingdom

2012-2018 **MD**, University of Medicine and Pharmacy at Ho Chi Minh City, Vietnam

EXPERIENCE

2021-2022 **Research assistant**, Mathematical Modelling Group, Oxford University Clinical Research Unit, Vietnam

2020-2021 **Editorial assistant**, MedPharmRes, University of Medicine and Pharmacy at Ho Chi Minh City, Vietnam

2019-2020 **Research intern**, Cancer Epigenetics Lab, Garvan Institute of Medical Research, Australia

2018-2023 **Biostatistical consultant**, Infertility Department, Tu Du Hospital, Vietnam

RESEARCH FUNDING

Secured \$237,930 in research grants since 2022.

2025-2026 *PI* \$55,456 Understanding how immunisation inequities drive measles outbreaks. *University of Oxford's internal 'Improving Equitable Access to Healthcare Pump Priming'.*

2024-2025 *PI* \$27,694 Modelling measles and hand-foot-mouth disease transmission dynamics in Ho Chi Minh city. *OUCRU's Programme Scientific Committee.*

2023-2025 *PI* \$29,961 The impacts of 15-month disruption in childhood vaccination programme on vaccination coverage and seroprevalence in Ho Chi Minh city. *OUCRU's Programme Scientific Committee.*

2022-2024 *PI* \$20,437 An R package for modelling infectious disease parameters based on serological and social contact data. *OUCRU's Programme Scientific Committee.*

2024-2025 *Co-I* \$104,382 Research cultures in Southeast Asia. *Wellcome.*

POLICY AND PUBLIC HEALTH IMPACT

2026 Technical advisor to Ho Chi Minh City CDC on the city's Infectious Disease Early Warning and Response System

2026	Advised Ho Chi Minh City CDC on assessing import risks of emerging international diseases: first implementation for Nipah virus
2024-2026	Trained an in-house modelling team at Ho Chi Minh City CDC, now able to conduct research and run routine outbreak analyses independently
2024-2025	Advised on the evaluation of Ho Chi Minh City's Infectious Disease Surveillance System
2024-2025	Benchmarked and recommended epidemic-threshold detection algorithms for Ho Chi Minh City CDC
2024	Modelled measles seroprevalence and immunity gaps to inform the Department of Health's decision to declare a measles outbreak and design the reactive vaccination campaign. Recognised as one of the city's top ten medical achievements of 2024
2024	Advised the development of a dashboard for monitoring infectious diseases at Ho Chi Minh City CDC

SERVICE AND LEADERSHIP

Conference and workshop organisation

2026	Abstract reviewer , International Pandemic Sciences Conference 2026, Singapore. Website
2026	Co-organiser, stakeholder member , Stakeholder Needs Assessment Workshop for Epidemic Preparedness and Response Modelling Training, Thailand.
2024	Scientific committee, organiser, session chair, plenary moderator, abstract reviewer , Infectious Disease Modelling Conference 2024, Thailand. Website

Networks and leadership

2024-now	Founder , Modelling Infectious Diseases in VIETnam (MIDVIE) Network. Website
2023-now	Co-founder ECR Community , Modelling Infectious Diseases in South East Asia (MIDSEA) Network. Website

SUPERVISION AND MENTORING

<i>Tenure</i>	<i>Role</i>	<i>Name</i>	<i>Next destination</i>
2024-2026	<i>RA</i>	Pham Nguyen The Nguyen	MPH programme at National Cancer Center Graduate School of Cancer Science and Policy
2023-2026	<i>RA</i>	Phan Truong Quynh Anh	PhD programme at University of Oxford
2022-2023	<i>RA</i>	Huynh Ngoc Tuyen	PhD programme at University of Oxford
2024	<i>Intern</i>	Nguyen Thanh Lam	MPH programme at University of Caen Normandie
2024	<i>Intern</i>	Julian Hough	BSc programme at Princeton University
2024	<i>Intern</i>	Huynh Xuan Loc	PhD programme at Boston University

AWARDS AND HONOURS

2022-2026	PhD Studentship: OUCRU & NDM Tropical Network Fund (University of Oxford)
2019	Outstanding Presentation , 36th Science & Technology Conference, Ho Chi Minh City, Vietnam
2018	Highest GPA in the 6-year medical doctor programme (highest in school history)

2018	Highest dissertation score
2013-2018	Annual highest GPA award

TEACHING AND TRAINING

<i>Year</i>	<i>People</i>	<i>Course</i>
Modelling		
2025	30	Modelling and Analysis of Serological Data: An Introductory Short Course. Teaching assistant for a course jointly developed by MRC Centre for Global Infectious Disease Analysis, Imperial College London and National University of Singapore. Oxford University Clinical Research Unit. Course page
2024-2025	15	Infectious disease modelling for babies. Methodologies for mathematical models of infectious diseases. Ho Chi Minh City Centre for Disease Control. Course page
2023	60	Introduction to mathematical models for controlling infectious diseases. Developing basic compartmental models and the use of reproduction numbers. Ho Chi Minh City Centre for Disease Control. Course page
Other courses		
2025	20	Academic writing for babies. Academic writing skills for early-career researchers. Ho Chi Minh City Centre for Disease Control.
2025	150	OUCRU R training 2025. A five-day course on R programming and visualisation for OUCRU staff and collaborators. Oxford University Clinical Research Unit. Course page
2024-2025	10	R café. Fortnightly reproducibility in research classes. Oxford University Clinical Research Unit, Ho Chi Minh City Centre for Disease Control. Course page
2024	40	R for babies. Monthly practical R programming classes. Ho Chi Minh City Centre for Disease Control. Course page

PRESENTATIONS

Invited talks	
2026	Application of AI and data science in disease surveillance and early warning system: Experience in collaborating with HCDC. <i>Thong Nhat Hospital's Scientific Seminar: Generative AI in healthcare</i> , Vietnam. News article
2026	Within country teaching: Vietnam. <i>Modeling for Infectious Disease in Southeast Asia FIESTA workshop</i> , Thailand.
2025	Emerging infections surveillance and outbreak response: A measles case study. <i>WHO visit to the Hospital for Tropical Diseases and Oxford University Clinical Research Unit</i> , Vietnam.
2025	Application of serosurveillance in the measles outbreak in Ho Chi Minh City, 2024-2025. <i>Infectious Diseases Research and Policy Discussion Forum</i> , Vietnam.
2024	Detecting measles immunity gaps via seroprevalence modelling in Ho Chi Minh City, Vietnam. <i>WHO-OUCRU Discussion: Modelling measles outbreak</i> , Vietnam.
2023	Assessing journal quality in public health research. <i>Ho Chi Minh City Centre for Disease Control's Scientific Seminar</i> , Vietnam.

Contributed talks

- 2026 Serosurvey evidence and modelling of immunity gaps in Vietnam. *Measles Analytics Hub Annual Meeting 2026*, Indonesia.
- 2026 Sustaining engagement: a training-research programme that works. *Policy-driven Infectious Diseases Modelling Workshop*, Singapore.
- 2023 Modelling during a crisis: Experiences from advising Department of Health during Ho Chi Minh City's most severe COVID-19 outbreak. *Modelling During A Public Health Emergency Workshop*, Thailand.

Posters

- 2023 denim: an R package for deterministic compartmental models with flexible dwell time distribution. *Epidemics9: 9th International Conference on Infectious Disease Dynamics*, Italy.

SOFTWARE

- 2025 **denim**. Construct and simulate deterministic discrete-time compartmental models with customisable dwell time distributions. [Package site](#)
- 2025 **serosv**. Analyse serological data and estimate infectious diseases parameters. [Package site](#)
- 2025 **tvmedg**. Causal mediation analysis using g-computation. [Package site](#)
- 2021 **MethPanel**. Analyse multiplex bisulphite PCR sequencing to assess DNA methylation biomarker panels for disease detection. [GitHub](#)
- 2020 **hss**. Estimate sample size for health study designs. [Shiny app](#)
- 2020 **Lifted**. Enhance genome conversion robustness during reference assembly updates. [GitHub](#)
