## EDUCATION

---

|           |     |                                                                  |
|-----------|-----|------------------------------------------------------------------|
| 2022-2026 | PhD | University of Oxford, United Kingdom                             |
| 2012-2018 | MD  | University of Medicine and Pharmacy at Ho Chi Minh City, Vietnam |

## EMPLOYMENT HISTORY

---

|           |                                                                                                                |
|-----------|----------------------------------------------------------------------------------------------------------------|
| 2021-2022 | Research assistant, Mathematical Modelling Group, Oxford University Clinical Research Unit, Vietnam            |
| 2020-2021 | Editorial assistant, MedPharmRes, University of Medicine and Pharmacy at Ho Chi Minh City, Vietnam             |
| 2019-2020 | Research intern, Cancer Epigenetics Lab, Garvan Institute of Medical Research, Australia                       |
| 2019-2020 | Research assistant (remote), Center for Population Health Sciences, Hanoi University of Public Health, Vietnam |
| 2018-2023 | Biostatistical consultant, Infertility Department, Tu Du Hospital, Vietnam                                     |

## GRANTS

---

I have successfully secured \$237,930 in research grants since 2022. Further details are provided below.

|           |      |           |                                                                                                                                                                                                   |
|-----------|------|-----------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2025-2026 | PI   | \$55,456  | <i>Understanding how immunisation inequities drive measles outbreaks.</i> Funding from University of Oxford's internal 'Improving Equitable Access to Healthcare Pump Priming'.                   |
| 2024-2025 | PI   | \$27,694  | <i>Modelling measles and hand-foot-mouth disease transmission dynamics in Ho Chi Minh city.</i> Funding from OUCRU's Programme Scientific Committee.                                              |
| 2023-2025 | PI   | \$29,961  | <i>The impacts of 15-month disruption in childhood vaccination programme on vaccination coverage and seroprevalence in Ho Chi Minh city.</i> Funding from OUCRU's Programme Scientific Committee. |
| 2022-2024 | PI   | \$20,437  | <i>An R package for modelling infectious disease parameters based on serological and social contact data.</i> Funding from OUCRU's Programme Scientific Committee.                                |
| 2024-2025 | Co-I | \$104,382 | <i>Research cultures in Southeast Asia.</i> Funding from Wellcome.                                                                                                                                |

## AWARDS

---

|           |                                                                                           |
|-----------|-------------------------------------------------------------------------------------------|
| 2022-2026 | PhD Studentship: OUCRU & NDM Tropical Network Fund (University of Oxford)                 |
| 2019      | Outstanding Presentation, 36th Science & Technology Conference, Ho Chi Minh City, Vietnam |
| 2018      | Highest GPA in the 6-year medical doctor programme (highest in school history)            |
| 2018      | Highest dissertation score                                                                |
| 2013-2018 | Annual highest GPA award                                                                  |

## RESEARCH TEAM

---

| <i>Tenure</i> | <i>Role</i> | <i>Name</i>            | <i>Next destination</i> |
|---------------|-------------|------------------------|-------------------------|
| 2024-now      | RA          | Pham Nguyen The Nguyen |                         |
| 2023-now      | RA          | Phan Truong Quynh Anh  |                         |

|           |        |                  |                                               |
|-----------|--------|------------------|-----------------------------------------------|
| 2022-2023 | RA     | Huynh Ngoc Tuyen | PhD programme at University of Oxford         |
| 2024      | Intern | Nguyen Thanh Lam | MPH programme at University of Caen Normandie |
| 2024      | Intern | Julian Hough     | BSc programme at Princeton University         |
| 2024      | Intern | Huynh Xuan Loc   | PhD programme at Boston University            |

## POLICY ENGAGEMENT

---

|           |                                                                                                                      |
|-----------|----------------------------------------------------------------------------------------------------------------------|
| 2024-2025 | Evaluated the city-wide infectious disease surveillance system                                                       |
| 2024-2025 | Led the benchmarking and selection of algorithms for defining epidemic thresholds                                    |
| 2024      | Developed a surveillance dashboard tracking time-varying reproduction numbers to enhance CDC's response capabilities |
| 2024      | Authored a rapid measles seroprevalence report to advise the Department of Health during an active outbreak          |

## TEACHING

### Modelling

| <i>Date</i> | <i>Attendees</i> |                                                                                                                                                                                                                                                                                                           |
|-------------|------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2025        | 30               | <i>Modelling and Analysis of Serological Data: An Introductory Short Course</i><br>Teaching assistant for a course jointly developed by MRC Centre for Global Infectious Disease Analysis, Imperial College London and National University of Singapore. Venue: Oxford University Clinical Research Unit. |
| 2024-2025   | 15               | <i>Infectious disease modelling for babies</i><br>Methodologies for mathematical models of infectious diseases. Venue: HCMC's Center for Disease Control. <a href="https://drthinhong.com/idm4b">https://drthinhong.com/idm4b</a>                                                                         |
| 2023        | 60               | <i>Introduction to mathematical models for controlling infectious diseases</i><br>Developing basic compartmental models and the use of reproduction numbers. Venue: HCMC's Center for Disease Control. <a href="https://lampk.github.io/IDMIntro">https://lampk.github.io/IDMIntro</a>                    |

### Others

| <i>Date</i> | <i>Attendees</i> |                                                                                                                                                                                                                                                                           |
|-------------|------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2025        | 20               | <i>Academic writing for babies</i><br>Academic writing skills for early-career researchers. Venue: HCMC's Center for Disease Control.                                                                                                                                     |
| 2024-2025   | 10               | <i>R café</i><br>Fortnightly reproducibility in research classes. Venue: Oxford University Clinical Research Unit, HCMC's Center for Disease Control. <a href="https://oucru-modelling.github.io/R-cafe-materials">https://oucru-modelling.github.io/R-cafe-materials</a> |
| 2024        | 40               | <i>R for babies</i><br>Monthly practical R programming classes. Venue: HCMC's Center for Disease Control. <a href="https://drthinhong.com/r4babies">https://drthinhong.com/r4babies</a>                                                                                   |

### Seminars

| <i>Date</i> | <i>Attendees</i> |                                                                                                                                      |
|-------------|------------------|--------------------------------------------------------------------------------------------------------------------------------------|
| 2024        | 40               | <i>Is this a good journal?</i><br>Training on identifying trustworthy scientific journals. Venue: HCMC's Center for Disease Control. |
